

NEEL AGRAWAL

Summary

Information Technology student at CHARUSAT with a strong interest in Artificial Intelligence, Machine Learning, Data Science, and Cybersecurity. Passionate about brainstorming ideas, experimenting with emerging technologies, vibe coding, and building solutions for real-world problems. Interested in turning ideas into practical projects through continuous learning and experimentation.

Education

Bachelor of Technology (B.Tech), CGPA: 8.12

**Devang Patel Institute Of Advance
Technology And Research,
CHARUSAT** **Changa, Anand**

Accomplishments

- Selected among the Top 20 teams in FinSpark '26, a national-level hackathon, as part of a team working on an AI-based cybersecurity solution focused on insider threat detection.

Projects

- Anvesha - Railway Station CCTV Monitoring AI:** Developed an AI-powered railway station CCTV monitoring concept for an internal institute-level SIH problem statement. Designed around existing CCTV infrastructure to monitor crowd buildup and security concerns and alert railway authorities for faster response.
<https://github.com/buildwithneel/ANVESHASHA>
- Garuda AI - Insider Threat Detection:** Developed a cybersecurity-focused AI project for FinSpark '26 exploring the detection of potential insider threats by identifying suspicious or potentially malicious behavior within an organization.
<https://github.com/buildwithneel/insider-threat-detection>
- Saarthi AI - AI Counselling for College Students:** Built an AI-based counselling concept for college students as a hackathon project. Explores how AI can provide accessible guidance for academic and student-life concerns; currently an early-stage, partially functional prototype.
<https://github.com/buildwithneel/saarthiai>
- GPS-Based Timer - Developing · Ongoing:** Currently developing a location-aware timer concept that combines GPS functionality with time-based actions to explore context-aware reminders and automated behavior.
